City Council

Dear Parents/Guardians,

This year's Car Free Day comes at a time when the impact of record fuel prices is felt, so on Thursday September 22, do you really need to take the car when dropping off and picking up the children from school? Think about an alternative way to travel, maybe walking, cycling depending on the distance.

World Car Free Day **encourages motorists around the globe to give up their vehicles for a day**. Many people around the world consider their car a necessity, Car Free Day encourages motorists to think about how they can use more sustainable transport for everyday journeys. This week we see a £2 cap placed on all bus journeys by the Liverpool City Region Combined Authority to encourage motorists to look at an alternative form of travel.

The day provides a chance for us to envision our roads, undominated by cars and vans and enjoy the cleaner air and safer streets that brings.

Kind regards

Road Safety Team Liverpool City Council
